

Stephan Witter

Bromington Hall District, Nain P. O, St. Elizabeth, Jamaica

I have always dreamt of becoming a Software Engineer since I was very young, getting into programming at the age of 14. I am very dedicated and passionate about my work. I am a fairly innovative person that gives a hundred percent at all times. I'm an individual that works well with others because I believe 'no man is an island' and teamwork makes work easier.
